

## So that your body feels good in your skin...

Body care today is a lot more than simply cleaning our largest organ - our skin. Body care is pleasure, a process that pampers you and provides tender loving care for your soul.

Make time for it because it is a good investment for your well-being and your inner balance. Well-cared for, beautifully smooth skin and the admiration of your best friend will be your reward.

It is time - show some skin!

## DEO CREAM

Antiperspirant

**REF:** 504 (R)

**PRESENTATION:** 100ml tube

The Dr. RIMPLER BODY Deo Cream protects against perspiration and body odor. One application in the morning lasts the whole day. This soft, white cream is very gentle to the skin and easy to apply without leaving a viscid film on the skin or marks on clothes. It provides 24 hours of freshness, is extremely skin-friendly and very effective.

### RECOMMENDED FOR:

For all skin types.

### CHARACTERISTIC:

One application of this antiperspirant in the morning lasts the whole day and protects against perspiration and body odor. It doesn't irritate the skin and especially after epilation it gives a very soft and pleasant feeling on the skin.

### INGREDIENTS & BENEFITS:

#### Aluminium Chlorhydrate

Aluminium salts are widely used in antiperspirants to create flakes which group together to form a fine structure. This structure blocks up the pores in your armpit to prevent perspiration. Benefit:

- Reduces secretion of sweat and used to treat people with mild to moderate hyperhidrosis or excessive sweating
- Reduces malodor by inhibiting bacterial and as antimicrobial agents, such as triclosan or polyhexamethylene biguanide.

### APPLICATION:

After cleansing apply a medium sized quantity to the dry skin. Use only once a day otherwise the natural perspiration is completely stopped.
