

ULTRALIGHT PROTECTING CREAM WITH VITAMINS - SPF15

Vitamins Sunscreen Cream SPF15

REF: 1.10110 (R) **PRESENTATION:** 25ml cannula tube

Ultra-light emulsion for anti-age special care with vitamins and Mango Fresh Cells for the daily protection of light-sensitive skin areas. Natural mineral pigments save the skin from UV-damages and give an even, brightened and porcelain complexion. Ideal additional product for the summer time to protect all sensitive skin sections, especially eye and cheek area, from exceeding UV-exposure. It reduces the formation of freckles and pigment spots.

RECOMMENDED FOR:

All skin type especially dull and photosensitive skin.

INGREDIENTS & BENEFITS:

Aloe Barbadensis (Aloe Vera)

Improves skin hydration, works as an anti-inflammatory and antiseptic, accelerates the turnover of collagen, and aids healing of cuts, grazes, burns and insect bites; prevents immune suppression caused by UVB by repairing damage to langerhans cells.

Mango Fresh Cells

A natural high-oxidative, wound-healing, and regenerative activity; traditionally used in the rainforests and tropics for its skin-softening, soothing, moisturizing and protective properties, reducing degeneration of skin cells; contains a natural protective effect against UV radiation.

Tocopherol

Source of vitamin E, a powerful antioxidant; promotes maximum moisturization and helps soften the skin while preventing cellular damage.

Panthenol

Derived from plants, Panthenol is also known as B5. It is a humectant property to optimize moisture levels. It stimulates the formation of new skin cells, improves healing and counteracts inflammation. Panthenol is also used to alleviate mild sunburns.

Bisabolol

The main active ingredient of Chamomile plant, Bisabolol has anti-inflammatory, anti-bacterial and anti-irritant properties and helps protect skin against environmental stressors. It has a calming property that is effective in significantly helping to reduce the appearance of redness.

ULTRALIGHT PROTECTING CREAM WITH VITAMINS - SPF15

Vitamins Sunscreen Cream SPF15

Sunflower Seed Oil

Sunflowers seeds yield a lightweight soothing and replenishing oil rich in unsaturated linoleic and oleic fatty acids and tocopherols and minerals. It has the properties of antioxidant and can retain moisture in the skin. It may also provide a protective barrier that resists UV damage.

PROPERTIES:

- Nurturing
- Moisturizing
- Protecting
- Calming
- Brightening

APPLICATION:

Apply daily in the morning on the cleansed skin as a day care to protect from sunlight. When necessary, it can be applied additionally over the usual day cream.

SALES IDEAS:

- Ideal add-on product in each year to experience the delicate skin around the eyes and scars
- To protect the area from excessive UV exposure or to reduce the formation of freckles and age spots
- Apply on top of usual care for protection from sunlight
- If necessary, apply makeup over it
- Portable design allows for frequent application on the go
