

CLEAR UP FOAM

Foaming active serum

REF: 660 (R)

PRESENTATION: 50ml pump bottle

Dr. RIMPLER BASIC CLEAR Clear up foam is designed for inflammation-prone oily problem skin. The causes of problem skin are systematically counteracted: Excessive cornification, hardening of sebum and the corresponding blocked flow, as well as bacterial flora imbalances. After cleansing, Clear Up Foam can be used on its own as a skin-care concentrate or underneath a moisturizing cream to specifically increase the anti-acne effect of the "triple-active complex". While a patented mixture of plant-derived surfactances dissolves hardened sebum, the anti-bacterial components work against bacteria such as propionic bacteria and wound-infecting bacteria. At the same time, berberine from Oregon grape extract and acteoside from plantain slows the conversion of arachidonic acid, which has a key role in inflammatory reactions.

RECOMMENDED FOR:

For oily and acne-prone skin. (Acne, pimples, blemish, blackheads and whiteheads)

CHARACTERISTIC:

Keratolytic, anti-inflammatory, antibacterial and antimycotic.

INGREDIENTS & BENEFITS:

Salicylic Acid

Salicylic acid is a key component to prevent the acne formation. It's have the ability to prevent further clogging by slowing down the shedding of the cells inside the follicles. Salicylic acid also helps soften blackheads and whiteheads.

Oregon Grape (Berberis Aquifolium)

Mahonia extract has clinically proven to show significant result in anti- microbial effect. It helps to kills parasites, bacteria, viruses, and other microorganisms. Providing detoxification and reduce inflammation benefits for problem skin.

Ribwort (Plantago Lanceolata)

The leaf has natural antibacterial and anti-inflammatory properties which great for healing wounds, and relieves itching, swelling and pain associated with skin irritants. On other hand, it also helps to promote collagen production, while a natural antioxidant, antibacterial and as repair features.

CLEAR UP FOAM

Foaming active serum

Mixture Of Plant Antibacterial Surfactants As Described By Dr.Straetman

A multifunctional wetting agent made from natural resources with moisturizing and refatting properties. It is skin friendly and has strong antimicrobial activity. It will improve and maintain the moisture and balanced environment of the skin and can help to combat skin impurities with its strong activity against Propionibacterium acnes. It has a high efficacy against microorganisms in a broader range of pH compared to many other compounds.

APPLICATION:

After cleansing apply generously Dr. RIMPLER Clear Up Foam to all concerned areas with a tendency to inflammations (face, décolleté, and back). The distinctive feature of this formula is the special foamer head creating a soft foam, which can be easily and simply extensively applied. Grace to this the product is not only very effective, but at the same time very economical as well. Attention! Even though that the product creates a foam, it is not a cleansing product, but an exceptionally high quality skin care concentrate.

IMPORTANT: Even though the product creates foam, it is not a cleansing product, but an exceptionally high quality skin care concentrate. Active substance concentrations such as those found here are usually only supplied in ampoules. Ampoules are not necessary for this product because the ingredients themselves are very effective against bacteria and require no further protection through elaborate packaging.
