

AGE INTELLIGENCE™
RECOVERY SERUM COMPLEX

It's been almost 10 years since Swissline launched Age Intelligence™, a new genre of skincare focusing on youth-inducing, rather than anti-aging. CELL SHOCK AGE INTELLIGENCE™ initially represented a skincare solution for women who had undergone aesthetic procedures, or who were planning to do so. Now, the new generation of Age Intelligence™ is that... and much more! It shelters against the effect of urban lifestyle hazards: stress... jetlag... sun abuse... and too much partying! These are the things that truly make women age faster.

Ref. 1195 - 30ml heavy glass bottle

Ref. 1195C - 150ml pump bottle

The BENEFITS

- Improves skin's self-renewal, to boost recovery.
- More suppleness to reduce the look of wrinkles and fine lines; can be used to prolong the effect of aesthetic treatments, such as Botox™.
- Skin looks more unified, signs of fatigue and stress are less apparent.

The CUSTOMER

- Consumers looking for skincare answering the needs of pre and/or post.
- All in-need of recovery, regeneration and solutions to curb dermal stress.
- All existing clients of high-end brands, including doctor brands.

The TECHNOLOGY

MADECASSOSIDE®*

Ultra-potent ingredient obtained from the plant *Centella asiatica*, also known as "tiger herb". Madecassoside®, isn't merely the extract of the plant used by most brands, but a purified isolated fraction that soothes stress-induced conditions and rebalances the skin repair. Swissline was the first Swiss brand to bring this active to the skincare market to soothe the sensation of dryness left by peeling, lasers and dermabrasion, a common side effect from these procedures.

RONACARE®**

Cyclopeptide proven to improve the skin structure and reduce wrinkle depth by 15%. It boosts production of basal membrane proteins, including collagen and laminins, as it simultaneously protects the tissues from collagenases and elastases, responsible for collagen and elastin breakdown. Conjugated with the benefits of "Botox" it can extend its visible results further.

AGE INTELLIGENCE™
RECOVERY SERUM COMPLEX

ECTOIN®***

Natural substance synthesized by an adaptive microorganism that thrives under extreme environmental conditions, such as glacier deserts and salt deserts. Can be called an "anti-stress" molecule as it helps to protect the cellular membranes from environmental hazards resulting from temperature variations or living in-doors / in-flights.

REPAIRING AMINO ACIDS

Some recognized for their ability to prevent water loss in the epidermis, others known to provide the skin with suppleness and improve skin tone. Glycine, alanine, proline, serine, arginine, lysine and glutamic acid.

CELLACTEL 2 COMPLEX

Cell Shock's signature complex assists all essential skin functions, while contributing to lift and revitalize it.

* MADECASSOSIDE® is a registered brand of BAYER.

** RONACARE® is a registered brand of Merck KGaA, Darmstadt, Germany.

*** ECTOIN® is a registered brand of Bitop AG, Germany.

RITUAL

Apply a few drops over face and neck before your usual skincare, and after cleansing and toning. Customize the ritual by adding one or more Age Intelligence™ boosters targeted to your individual skincare needs.

Believe in science-led transformation.

TEXTURE

Silky, milky, evanescent, in unison... pampering!

Paraben-Free - Allergen-Free - Colour-Free - Worry-Free

AGE INTELLIGENCE™
RADIANCE BOOSTER - 10% VITAMIN C

ILLUMINATING – ANTI-FATIGUE – TONING

A flash of positive energy and freshness.

In topical use, vitamin C is of real benefit for the skin. Recognized as an antioxidant, it illuminates the complexion and reduces the signs of age. Vitamin C tones the skin when used over a prolonged period. Water soluble in its pure form, it is more stable in the form of a powder, but then the leisure of the cosmetic ritual is lessened. Here we offer a formula combining pure L-ascorbic acid - the most active, yet less stable form of vitamin C - and an ascorbic acid salt form, which greatly contributes to a better stability of the very high concentration used.

Ref. 1196 - 20ml glass bottle

Ref. 1196C - 50ml pump bottle

The BENEFITS

- Results in a fresher-looking skin, vibrant and younger complexion.
- Prolonged use contributes greatly to a firmer skin.
- Reverses photo-aging at cellular level with strong anti-oxidant power.

The CUSTOMER

- Lackluster and tired-looking skin.
- All in-need of recovery, regeneration and solutions to curb dermal stress.
- Consumers looking for skincare answering the needs of pre and/or post.
- A great addition to boost all Age Intelligence and Cell Shock White treatments.
- All existing clients of high-end brands, including doctor brands.

The TECHNOLOGY

STAY-C® 50*

Molecule obtained by binding pure L-ascorbic acid and Ascorbyl Sodium Phosphate, creating a more stable form of vitamin C. An innovative form with multiple effects that meets most skin needs; which has been registered as quasi-drug in Japan. Clinical tests on a 3D skin sample and in vivo studies have fully demonstrated its effective brightening effect on the skin.

* STAY-C® 50 is a registered brand of DSM Nutritional Products AG (DSM Nutritional Products SA /DSM Nutritional Products Ltd), Switzerland. Stated in vivo studies carried out by DSM with a panel of 40 volunteers aged 35-45 years old.

AGE INTELLIGENCE™
RADIANCE BOOSTER - 10% VITAMIN C

ILLUMINATING – ANTI-FATIGUE – TONING

RITUAL

Radiance Booster can be applied am and/or pm as needed, mixed in the palm of the hand with the Recovery Serum for maximum results, or directly in your usual cream for a boost. During the first week, we advise limiting the use to the pm, so as to allow skin to better adapt. 2-3 drops are enough, more can be used if needed. The use of adapted UV protection during the day is imperative to better protect the skin (and the vitamin C in the formula!)

TEXTURE

Watery gel; made to *mix-in* anything we can call skincare!

Paraben-Free – Allergen-Free – Without Phenoxyethanol – Parfum-Free
Colour-Free – Vegan – Cruelty-Free

AGE INTELLIGENCE™
PERFECTION BOOSTER - 10% LACTIC ACID

RESURFACING – REFINING PORES – SMOOTHING LINES

A no-mercy booster to target imperfections for a fresh skin and refined texture.

Of all the forms of AHA, lactic acid is the only naturally occurring in the skin. It actually protects the natural pH of the skin from external alkalinizing factors. When used in a concentration of at least 1% and associated to a sufficiently low pH, lactic acid is an excellent exfoliator. Under its effect, the skin renews faster, its grain becomes thinner and more even.

Ref. 1197 - 20ml glass bottle

Ref. 1197C - 50ml pump bottle

The BENEFITS

- Resurfacing and smoothing skin texture.
- Reduces pore size and fine lines.
- Reverses signs of photo-aging at a superficial level with a soft peeling.

The CUSTOMER

- Irregular skin textures and all in-need to activate skin renewal.
- A great addition to boost all Age Intelligence, Cell Shock White and Aqua-Pure treatments.
- All existing clients of high-end brands, including doctor brands.

The TECHNOLOGY

LACTIC ACID 10% conc. (final formula pH is 3.70)

Offers a powerful yet gentle peeling solution. The risk of minor irritation cannot be ruled out at this concentration, yet it is minimized as long as product is mixed-in because the mixing will dilute its impact to some extent. The lactic acid used in this formulation derivate from a fermentation process of barley and corn as row material. 100% of vegan origin.

RITUAL

Perfection Booster should be applied pm only, mixed in the palm of the hand with the Recovery Serum for maximum results, or directly in your usual cream for a boost. For a more intensive effect, it can be applied directly to the skin prior to the Recovery Serum or to the cream, and allowed to penetrate before layering the next product (only in the case of clients following a continued use of AHAs).

The use of a high SPF during the day is imperative.

AGE INTELLIGENCE™
PERFECTION BOOSTER - 10% LACTIC ACID

RESURFACING – REFINING PORES – SMOOTHING LINES

RITUAL

Avoid contact with eyes. If irritation persists, discontinue use and consult a physician.

TEXTURE

Watery gel; made to *mix-in* anything we can call skincare!

Lactic acid has a characteristic scent that some people find unpleasant; remember it is used diluted, mixed-in a serum or cream so this tends to be a minor problem.

If ever this becomes an issue, it can simply be mixed-in a serum or cream containing some sort of fragrance.

Paraben-Free - Allergen-Free - Without Phenoxyethanol - Parfum-Free
Colour-Free - Vegan - Cruelty-Free

AGE INTELLIGENCE™
EVENNESS BOOSTER - 2% ALPHA-ARBUTIN

EVEN TONE – ANTI-SPOT

The key that unlocks all doors leading to the swift exit of hyper-pigmentation, one of the most complex skincare concerns. Alpha Arbutin, a more powerful version of classic arbutin used in cosmetology, contributes to a reduction in the appearance of age-related spots. We use it at the highest possible concentration of 2% as opposed to the standard concentration of less than 1%.

Ref. 1198 - 20ml glass bottle

Ref. 1198C - 50ml pump bottle

The BENEFITS

- Lightens existing spots and prevents their reappearance. Evens out the skin tone.

The CUSTOMER

- All concerned with pigmentation and uneven skin.
- A great addition to boost all Cell Shock White treatments.
- All existing clients of high-end brands, including doctor brands.

The TECHNOLOGY

ALPHA-ARBUTIN

Arbutin is a glycoside phyto-chemical extracted from bearberries, among many other medicinal plants that also contain it. Applied topically, it strongly inhibits tyrosinase and thus prevents the formation of melanin. Alpha-Arbutin is a much more complex engineered form of arbutin, obtained from the cross linking of the glycoside with one hydroxyl molecule (= oxygen + hydrogen) to form a faster penetrating ingredient. A fast penetration is key for a deep impact on skin, before arbutin is degraded by skin's own enzymes, and loses power.

RITUAL

Evenness Booster can be applied am and/or pm as needed, mixed in the palm of the hand with the Recovery Serum for maximum results, or directly in your usual cream for a boost. 2-3 drops are enough, more can be used if needed. Just as is the case with vitamin C, the use of adapted UV protection during the day is imperative to better protect the skin (and the alpha-arbutin!)

TEXTURE

Watery gel; made to *mix-in* anything we can call skincare!

AGE INTELLIGENCE™
EVENNESS BOOSTER - 2% ALPHA-ARBUTIN

EVEN TONE – ANTI-SPOT

Paraben-Free - Allergen-Free - Without Phenoxyethanol - Parfum-Free
Colour-Free – Vegan - Cruelty-Free

AGE INTELLIGENCE™

SOURCE BOOSTER – 1.5 % HYALURONIC ACID + NMF
+ ATP

PLUMPING – HYDRATING – ENERGIZING

A source of all things good for a younger-looking skin

While hyaluronic acid can attract up to 1,000 times its weight in water, this determines the depth of hydration, which is delivered into the skin. Our formula combines a high 1.5% concentration of hyaluronic forms to achieve multi-depth hydration and plumpness. The formula is further enhanced by several components of the skin's own Natural Moisturizing Factor (NMF). To add a boost cellular energy to the skin, the formula also contains ATP (adenosine triphosphate), an essential energy molecule.

Ref. 1199 - 20ml glass bottle

Ref. 1199C - 50ml pump bottle

The BENEFITS

- Fast and deep hydration.
- Plumps the skin, resulting overtime in much less visible fine lines.
- Boosts the activity of all the other anti-aging ingredients, thanks to the action of ATP.

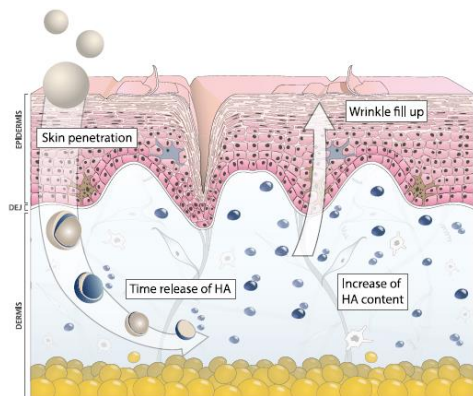

The CUSTOMER

- All concerned with dehydration, dryness and fine lines.
- A great addition to boost all Age Intelligence, Cell Shock and Aqua-Vitale treatments.
- All existing clients of high-end brands, including doctor brands.

The TECHNOLOGY

HYALURONIC ACID 1.5%

The formula uses a combination of multi-molecular weight hyaluronic acids, including Hyalusphere®* - a patented vectorised encapsulated form of HA. Thanks to its unique structure, the penetration of both low and higher molecular weights are enabled, contrary to the classic uses of higher molecular weights that can only remain on the skin's surface.

Multi-layer spheres containing different molecular weights are released over time to deeply replenish and densify the skin, increasing the HA content of deeper layers of the skin. This results in a visible plumping effect over time.

*Hyalusphere® is a registered brand of Givaudan France SAS

AGE INTELLIGENCE™

SOURCE BOOSTER – 1.5 % HYALURONIC ACID + NMF
+ ATP

PLUMPING – HYDRATING – ENERGIZING

NMF

NMF refers to the elements naturally present in the skin which keep the outer layers protected and well-hydrated; it is made up of various amino acids, fatty acids, triglycerides, urea, ceramides, phospholipids, sodium PCA and many other compounds. In this formula we are using a "cocktail" that contains sodium PCA, sodium lactate, arginine, aspartic acid, PCA, glycine, alanine, serine, valine, proline, threonine, isoleucine, histidine and phenylalanine.

ATP

An essential intercellular energy transfer molecule - ATP (adenosine triphosphate) is also known as cellule's currency unit of exchange, playing a determining role as a source of vitality. Living things use ATP like batteries, storing or consuming energy as needed.

RITUAL

Source Booster can be applied am and/or pm as needed, mixed in the palm of the hand with the Recovery Serum for maximum results, or directly in your usual cream for a boost. 2-3 drops are enough, more can be used if needed.

For its immediate skin conditioning effect, it can also be mixed-in any fluid or cream make-up, CC creams or make-up primers for additional plumping benefits.

TEXTURE

Silky white; made to immediately smooth and please the skin!

Paraben-Free - Allergen-Free - Without Phenoxyethanol - Parfum-Free
Colour-Free - Vegan - Cruelty-Free
