

THE GEL

Liposome gel

REF: 685 (R)
685.1 (C)

PRESENTATION: 50ml tube
200ml tube

Oil-free, mattifying special care with moisturizing liposomes and a highly effective cocktail of raw materials to even out imbalances in blemished skin. This high-impact, natural ingredient complex lastingly regulates the sebaceous glands and effectively acts against inflammation and impurities. Combined with the exfoliating effect of the salicylic acid, this very soon leads to visibly refined pores along with reduced inflammation, blackheads and oily shine.

RECOMMENDED FOR:

For impure, oily and acne-prone skin.

CHARACTERISTIC:

Anti-inflammatory, moisture-regulating, keratolytic, oil-free, strengthens the skin barrier and mattifying.

INGREDIENTS & BENEFITS:

Rye Ferment Extract

This patented organic ingredient from rye has a natural, gently clarifying effect, normalizing the skin flora by selectively killing off pathogenic germs. This prevents skin irritation and supports regeneration of the matrix. Relieves itching, strengthens the skin barrier, smooths and nourishes the skin, which improves the flow of sebum.

Salicylic Acid Complex 2.0

One of the strongest and best active agents for the rapid reduction of cornification disorders. The cosmetically use has been limited to 2% due to its instant effect. With this new active ingredient, the acid is present in a bound form, which is therefore compatible and makes the maximum permitted concentration without side effects possible as a deposit on the skin.

Panthenol

Is the precursor of the B-Vitamin and is preferably used in product for sensitive skin, as it is very well tolerated and has skin soothing and regenerative properties: Grace to the maintaining moisture, it strengthens the barrier function and improves the viscose-elastic properties of the skin.

THE GEL

Liposome gel

Marine Exopolysaccharide

This pure substance is cultivated and produced naturally from a special type of plankton. The isolated active agent interferes in the production of GAGs and therefore develops a deep-seated water reservoir in the skin. At the same time, it has been shown that the proteins which are important for the keratinization are stimulated in the epidermis and that keratinization is normalized in a natural way, without irritating the skin from the outside with the different manual peeling methods.

Tapioca Starch

Tapioca is the starch gained from the cassava (manioc) root. It is a white powder that is used in skin care product to improve consistency. Cassava hydrates the skin tone making it soft and smooth instantly.

Liposome NMF

Encapsulated in liposomes, there are various natural moisturizing factors that naturally hydrate the skin and sustainably support its skin barrier function shield.

APPLICATION:

Apply to cleansed and toned skin. Possibly in combination with The Concentrate underneath.

BEAUTY SPA:

Oil-free final care after treating blemished skin with Dr. RIMPLER PROFESSIONAL White Baltic Gold, Tea Tree Oil Mask or Collagen Matrix. Not suitable for massage.

SALES IDEAS:

Especially recommended for oily skin prone to inflammation and blemishes. Stops bacteria and ensures germ-free skin flora. Dr. RIMPLER The Gel is especially effective for men who suffer from skin irritation after shaving or from beard folliculitis.
