

## THE PEEL

Enzyme peeling

**REF:** 695 (R)

**PRESENTATION:** 15g in dispenser bottle

Gentle, enzymatic exfoliator in powder form for regular intensive cleansing and deep-clarifying of the skin. Mixed with water, it produces a fine, soft foam that cleanses deep down in the pores after only a short time on the skin. A pair of selected enzymes ensure the breakdown of fats, excess oil and the keratin of dead skin cells. Combined with the exfoliating effect of the salicylic acid, this very soon leads to visibly refined pores along with reduced inflammation, blackheads and oily shine.

### RECOMMENDED FOR:

For all skin types, especially acne-prone, blackheads and large pores.

### CHARACTERISTIC:

Keratolytic, cleansing and clarifying.

### INGREDIENTS & BENEFITS:

#### Salicylic Acid Complex 2.0

One of the strongest and best active agents for the rapid reduction of cornification disorders. The cosmetic use has been limited to 2% due to its instant effect. With this new active ingredient, the acid is present in a bound form, which is therefore compatible and makes the maximum permitted concentration without side effects possible as a deposit on the skin.

#### Lipase

The upper layer of the skin is mostly made of dead skin cells containing keratin protein. Lipase enzymes work by specifically breaking down the keratin protein, resulting in smoother skin and refine the pores.

#### Protease

It is a protein degrading enzyme; this enzyme breaks down the protein bonds that cause inter-corneocyte cohesion and promote the natural shedding of dead skin cells. Some of the more commonly used enzymes in skin care formulation include bromelain and papain.

## THE PEEL

Enzyme peeling

### **APPLICATION:**

Take a little powder in damp hands and rub to form a lather. Distribute over dampened skin of the face, neck and décolleté. Leave to take effect for 5 minutes until touch-dry, then use a little water to lather the peel and rinse off thoroughly, paying attention to the eyebrows and hairline.

### **BEAUTY SPA:**

Gentle intensive cleansing for blemished, sensitive and/or demanding skin as part of a treatment.

### **SALES IDEAS:**

A must-have for beautiful, smooth, clear skin. Practical, easy to use and highly effective. Sensational texture with soft, smooth foam.
