

CELL SHOCK AGE INTELLIGENCE™ RESURFACING WATER

10% GLYCOLIC ACID + MADECASSOSIDE

GLOWING, REFINED, BEAUTIFUL SKIN

Effortlessly transform the look, feel and condition of your skin with this remarkable toner. The plant cells and soy proteins in the formula increase the skin's ability to breathe, preserve energy and metabolize more effectively. Glycolic acid, present at 10% - the highest possible strength in a final formula - with a pH low enough to retain its full effect, delivers a progressive at-home peeling.

Ref. 1194 – 100 ml bottle

THE BENEFITS

- Provides the ultimate exfoliation
- Refines pores, brightens, smooths fine lines and reduces post-acne marks
- Energizes and revitalizes
- Boosts the effect of all Age Intelligence products, or any other skincare

THE CUSTOMER

- Anyone looking for an acid toner with the highest possible concentration of AHAs
- Existing clients of high-end brands, including doctor brands

THE TECHNOLOGY

MADECASSOSIDE®

Present in all Age intelligence formulas, Madecassoside®, also known as "tiger herb," isn't merely the extract of the plant *Centella asiatica*, used by most brands, but a purified isolated fraction that soothes stress-induced conditions and rebalances the skin repair. Its presence in the Resurfacing Water formula helps to minimize minor irritations caused by the high % glycolic acid.

GLYCOLIC ACID 10%

Derived from cane sugar, glycolic acid is the smallest molecule in the group of AHA actives so it is able to penetrate the skin deeply and easily, making it the most effective AHA. Chemical peels using a high percentage of this acid and can be very effective when done safely and properly. An even better way to use glycolic acid is as a daily exfoliator, providing the same results as stronger peels but greater ease and safety ... and often better results as the consistent application makes the effects cumulative

swiss line

BY DERMALAB 

CELLACTEL 2 COMPLEX + ARGAN PLANT CELLS

Our world-renowned signature ingredient, Cellactel 2 Complex, offers its plant-based nutrients, proteins and trace elements to help boost the supply of oxygen to the cells.

Additionally, a cell culture obtained from plant cells further boosts dermal renewal accelerating the skin's natural repair process. It combats chronological aging and works in synergy with the high-potency 10% glycolic acid for an impressive cellular turnover rhythm. These plant cells have been obtained from Argan trees (*Argania spinosa*), while the cell culture has been grown in Switzerland.

RITUAL

Apply over the face and neck areas, either with a cotton pad or simply with palm of the hand.

Night-time only, after the usual cleansing and before serum and/or moisturizer. Do not rinse after application.

For best tolerance, begin applying every other night, working up to a nightly frequency after one or two weeks. Should you feel too much sensitivity on a nightly basis, you can scale back and simply use it every other night, or even less, according to tolerance / needs.

This formula contains a high-potency level of glycolic acid and for this reason should not be used by people who are too sensitive to AHA (Alpha Hydroxy Acids) or have a history of intolerance to peeling products. Do not apply over wounds, inflammation, acne or rosacea areas.

The use of sun protection in the morning is strongly advised as AHAs can pose a risk of sun burn, whenever skin is not properly shielded from UV exposure.

TEXTURE

Water-to-essence.

Paraben-free - Allergen-free – Alcohol-free – Oil-free - Colour-free - Vegan – Cruelty-free
