

CSW BRIGHTENING BI-PHASE VEIL SPF 45 PA +++

This feather-light veil offers advanced mineral and probiotic protection. The broad spectrum formula contains antioxidants, anti-pollution agents and vitamin E to combat dryness.

Ref. 1819 – 45 ml

THE BENEFITS

- Shields skin with a cocoon of purity and a balanced microbiome
- Prevents future pigmentation disorders triggered by environmental assaults
- Offers immediate brightening, and acts a primer for makeup

THE CUSTOMER

- Recommended for all skin types

THE TECHNOLOGY

BIOTIC-SHIELD COMPLEX

Natural ferments from bacteria *Thermus thermophilus* and plankton, join forces to neutralize pollution particles, while strengthening the skin's own flora to fight aggressors... almost like a self-defence system.

100% MINERAL FILTERS

Broad spectrum filters, including titanium dioxide and aluminum hydroxide micronized particles, physically shield the skin from various forms of UV radiation.

BRIGHTENING NETWORK

An association of different reflective micro-powders and prisms smooth the complexion and even the skin's color for an immediate brightening effect.

THE RITUAL

Use every morning after daytime moisturizer.

Shake well and apply a thin layer over the face and the neck, avoiding the eye area.

For even better protection, we advise applying "double SPF" - add a few drops of SPF to moisturizer by mixing them together in the palm of the hand prior to application. This mixed-in phase should not replace a second evenly applied layer of the SPF. It is exactly because there are two phases we call it "double SPF"!
